Air Safety Investigator
Western Pacific Region

Date: July 20, 2026

Subject: Crew's Review of U60 Data

During a telephone conversation with the pilot-rated-passenger, he confirmed that he and the pilot reviewed the Big Creek (U60) Recommended Standard Operating Procedures (IDA SOP), produced by the Idaho Division of Aeronautics, while they were at Smiley Creek Airport (U87) Smiley Creek, Idaho. The pilot-rated-passenger did not review the Fly Idaho document that was found in the airplane and stated that the pilot might have reviewed that document.

The pilot-rated-passenger confirmed that when he originally stated that he reviewed the NOTAM for U60, he was referring to the IDA SOP.
