

Andrew Swick
Aviation Accident Investigator
AS-WPR

Date: December 2, 2025

Subject: WPR24FA290 Memorandum of Record of CTAF Recording

Contact: N/A

A recording of the common traffic advisory frequency (CTAF) on August 31, 2024, at Gness Field Airport (DVO), Novato, California, captured the pilot of the accident airplane (N2912T), transmitting over the frequency. The pilot announced to the local traffic in the area that he was taxiing from the parking area at DVO to the approach end of runway 31. About 3 minutes later the pilot again announced that he was departing on runway 31 with a departure of the area to the South, then quickly changed the departure to the North.
