NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

We had planned to 2 ship ferry flight with N5287 as lead going to KSEE and N3137K as wingman destination KPAW. Flight originated from KWW. Two flight was to remain together until south of R2515 where would break up and continue to respective destinations. At this point we had ~~that~~ briefed we would accelerate to 250 kph at which time the wingman would pull up and cross over lead a/c. When we had accelerated to 250 kph the wingman was cleared to detach at which point N5287 observed N3137K pull up and bank left. Lead pilot then took his eyes off of wingman and at next sight wingman was nearly inverted over lead a/c. and immediately there after collided. Following collision N5287 was able to make a controlled gear up landing on a road. Apparently N3137K was unrecoverable.

Weather was CAVU for entirety of flight
