Hi Andrew,

I spent the night in the hospital on a cardiac monitor.
Had a CT scan, an EKG, an ECG and multiple blood tests
Wore a Zio monitor for 14 days.

And after all that still no cause identified. Comment last week from the cardiologist regards the Zio monitor data was it was unremarkable as were the results from my hospital stay.

Only guess from the medical staff was that my recent recovery from Covid may have played a part.

Will send you the narrative tonight, I need my logbook to fill in the hours.

Andy

Andy,

Can you tell me if you got looked at by a physician and if they ever found anything that may have caused the loss of consciousness?
