Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

LEFT WING TIP Damage. Damage to wing struts & ~~Aileron~~^{de} Aileron.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Depart from BMC to UTA with my wives 15 year old little brother in the back/rear seat. He had never flown in a General aviation plane. about 10 miles out from UTA he stated that ~~we~~ he was feeling queasy. He was getting airsick. we opened up the vents & that was helping. on base leg he stated he was going to throw up. I asked to make sure he had a barf bag. he said he did. on final he started puking & the smell overcame me. I knew not to turn around & see the damage but I did. He had missed most of the bag & the puke was all over him & his face. when I turned back to focus on landing I was uncoordinated I thought I could line up & save it but now my mind was racing. on landing I was uncoordinated & this caused a ground loop on roll out. Damage to the Left wing tip & aileron was the only damage as it scraped the ground. No Damage to Property. The Airpark owner came over and helped me push my aircraft into his tie down area so to not be in the way for other aircraft using the runway.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

instead of focusing on letting myself want to put passenger comfort I should have focused on landing. I should have not turned around to check on passenger as he started to get airsick on short & final. My focus should have been on a stable approach.
