Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

SEE ATTACHED PAGE "9a"

Narrative, history of flight:

Airport of departure was Redding, CA, KRDD. After doing a preflight inspection and run up, I departed on runway 34 with a departure to the northeast. I had picked up flight following, with squawk code, while on the ground at Reading. Reading tower handed me off to Oakland Center and I continued a climb to the northeast to our initial cruise altitude of 11,500 feet. After reaching cruise altitude, I set economy cruise power and switched fuel tanks. I made a turn to the east near Fall River Mills (O98) on a course to take me near Wendover UT (KENV). I was taking this route on the advice of multiple weather briefers who had advised me that the weather was better on the eastern side of Nevada as opposed to flying down the western side by the California border.

At some point, we were advised by Oakland Center that they were going to lose radar contact and we were advised to squawk VFR. Within what seemed like half an hour or so, we were able to reestablish flight following with ATC and were given a new squad code.

In the vicinity of Winnemucca Municipal Airport(KWMC), I climbed to 13,500 feet to give myself an extra margin of safety when passing over upcoming mountain ranges along my route. After leveling off and setting cruise power at 13,500 feet I switched fuel tanks again. Shortly after, I also initiated a slight turn to the south east to cut the corner of my flight plan in order to save time.

Approximately 20 minutes after my climb to 13,500 feet there was a loud clunk from the engine compartment, accompanied by strong vibrations, and the strong smell of oil in the cockpit. I immediately turned on the fuel boost pump, and switched fuel tanks. I also initiated a turn to the west northwest as there were clouds and what looked like ground fog ahead of me. I made a radio call to Salt Lake Center and declared an emergency. They advised me of the location of Elko airport, but I was able to quickly determine that Elko was well outside the planes glide capabilities. At about this time, the vibration stopped and the engine quit all together. I attempted an engine restart procedure, which was unsuccessful. I believe at this time I advised air traffic control that we had complete engine failure, and that I was looking for a place to land. I set a course, toward a mine I had seen, hoping to find a road. I was unable to see anything suitable for landing. Looking at the ground, I determined that a gear up landing was the safest, as I felt the soft wet terrain, rocks, and brush increased the odds of the plane flipping with the gear down.

I found what I felt was a suitable hillside for an emergency landing. I landed the plane. My wife and I evacuated to a safe distance from the plane.
