Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Damage to the aircraft consisted of a broken propeller and presumably the need to inspect the engine due to a prop strike.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

My new propeller is lighter with a lower moment of inertia and has had trouble starting since installation. It gets stuck at top dead center requiring multiple tries with the starter motor, but in previous flights would eventually start. The morning of the accident however, I was unable to start the engine because the prop was stopped at top dead center. I went in front of the plane standing on the float to reposition the prop to a spot that would be easier for starting the engine. I must have forgotten to turn off the magnetos, because as soon as I moved the prop, the engine started up and the propeller struck me and threw me to the ground. The engine did not continue to fire after striking me. I immediately got up and ran towards the FBO and ran into an employee who called the ambulance which eventually took me to life flight and flew me to the Tri-Cities.

RECOMMENDATION (How could this accident/incident have been prevented?)
