Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

Damage to the right wing, right wheel strut, fuselage.

# NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The purpose of flight was instructional, to practice take offs, landings and go-around procedures. I met my student, we complete the preflight inspection, checked the weather and NOTAMs, pulled the airplane out of the hangar, got in, fastened our seatbelts, locked the doors, started the engine and recorded ATIS information. Then we contacted Livermore Ground, received taxi clearance, read back the clearance and taxied to runway RW 25L. After completing runway checklist we contacted Livermore Tower, received takeoff clearance for left closed traffic pattern. We read back the clearance, took off and complete series of touch-and-goes and go-arounds, my student had flight controls and did very good job, although she had a tendency to apply right aileron instead of right rudder pressure on takeoffs, that I was correcting. On the last landing she was flaring too high and I called "go-around". She didn't add full power and applied some back pressure and right aileron. I took the flight controls acknowledging "I have the flight controls" and tried to recover, initiated a go-around procedure according to the aircraft flight manual, added full power and reduced the flap setting to 25° but it was too late and the airplane stalled and hit the ground with its tail and right wing tip, went off the RW to the right. I kept the power on and applied some left aileron to prevent the airplane of tumbling and after returned wings to level attitude cut power to idle and stopped the airplane, at that time crossing parallel RW 25R. Stopped at TWE I verified that my student was OK and the airplane was safe to taxi. I requested a taxi clearance from Livermore Ground and taxied back to the hangar.

**RECOMMENDATION** (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I would suggest not to use 40° flap setting on instructional flights with new students practicing their first take offs, landings and go-around procedures.
