Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Prop Strike, Sudden Stoppage, Main Landing Gear detached, Right Lower wing spar broken, spreader detached, airframe damaged in several locations, lower wing leading edges and left wing tip heavily damaged, upper wing deformed, fuel tanks ruptured. Aircraft destroyed.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On June 7, 2024 at approximately 17:10 Local Time (PST), after receiving a load of rice seed of 2400-2500 lbs, I pulled away from the loading area. Observing the wind sock and assessing aircraft performance from the previous loads hauled from this same airstrip, I expected suitable performance to perform a successful departure.

At mid-field, the tail came up as expected. A check of the engine instruments showed expected performance. At that point, acceleration seemed diminished.

At which point power was increased to the stops, my focus on maintaining the best attitude of the aircraft for a successful lift off. Rotation to three-point attitude was initiated.

The aircraft then struck the embankment at the end of the airstrip. A slight lift-off was indicated, but was followed by a nose-down pitching moment, which was unrecoverable.

Upon impact, the aircraft pitched forward and yawed right before settling on it's lower fuselage and slid to a stop.

I announced on company radio that I was down, but OKAY. I then shut down the aircraft systems and then departed the aircraft without further incident.

Frank H. Michaud - [REDACTED] - Nothing Follows.
