

Kristyn Blocher
Air Safety Investigator
Western Pacific Region

Date: 6/18/24

Subject: WPR24LA189

Contact: Brian Ahlers, pilot

Per a telephone conversation on 6/18/2024 with Mr. Ahlers:

Mr. Ahlers stated that after he heard the stall warning horn sound and he could no longer control the airplane, he assumed that the airplane had stalled. It banked to the left and impacted the ground in the vineyard to the left of the runway. It spun around and stopped in the vineyard, facing the opposite direction as he had originally approached the runway.
