NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On May 18th, 2024, at approximately 0800 solo student doing touch-and-go standard pattern approaching on final on my final 8th touch and go with a quartering crosswind to the left of 5 knots of runway 21L with full flaps. After ~~touch down~~^{MP} touched down on center line, reapplied the power setting to full throttle and began looking for rotation speed at 55 knots. Pitching up at about approximately 3-5 feet in the air, a couple of birds flew across ~~my~~^{MP} the windshield close to the propeller and shook me. My immediate action were to abort the takeoff and land within the remaining runway since I had enough room. The aircraft free fall in ~~the~~ causing to veer to the left across the taxi way onto the ditch causing the aircraft to halt.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation
