

NATIONAL TRANSPORTATION SAFETY BOARD PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT

This form to be used for reporting civil and public aircraft accidents and incidents

BASIC INFORMATION

Accident/Incident Location

Nearest City/Place: Lemoore State: CA

ZIP: 93245 Country: USA

Latitude: _____ Longitude: _____

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

Date: 06/18/2024 Local Time: Approx 10am
mm/dd/yyyy

Time Zone: PST

Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

Registration Number: C-GJBG

Manufacturer: Piper

Model: PA-31

Serial Number: 31-7612033

Year of Manufacture: 1976

Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Kit/Plans ☐ Original Design Make: _____

☐ IFR-Equipped and Certified

☐ Commercial Space Flight

☐ Unmanned Aircraft

Maximum Gross Weight: 6840 lbs

Weight at Time of Accident/Incident: _____ lbs

Number of Seats: 2 Flight Crew Seats: 2

Cabin Crew Seats: 0 Passenger Seats: 0

Number of Engines: 2

Category of Aircraft

- ☒ Airplane
☐ Balloon
☐ Blimp/Dirigible
☐ Glider
☐ Gyroplane
☐ Helicopter
☐ Powered Lift
☐ Rocket
☐ Ultralight
☐ Unknown

Type of Airworthiness Certificate

(Check all that apply)

Standard

Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Unable to access aircraft, but from memory, damage to wings, nose and landing gear.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The morning of June 18th, 2024, a flight plan was filed for a 5-hour survey flight just south of Lemoore. I am new to flying survey and was being trained by Harneet who was hired by the company as an operator about two months ago. Harneet has more PIC hours on type than I do and went to school to be an aircraft mechanic engineer so a company decision was made for him to train me. I was previously being trained by another pilot but did not get to do any survey training with him as he had to leave for another job. This was my second day of survey training. The routing was similar to the previous day's flight, but it was planned to extend our survey time. We left on schedule at 5:30am wheels up from Madera and were scheduled to land at 10:30am PST back at Madera. We left with full tanks which would provide us with about 5:45 hours of fuel, leaving more than minimum for reserve VFR day operation. After takeoff, we switched to the outboard tanks and set the timer for 1:50. We then flew south to commence the survey. After 1:50 we switched to the inboard tanks and set the timer for 2 hours. The terrain was a combination of flat and high mountains. Some mountain tops were close to 4,000 feet high. The fuel calculation was based on cruise and climb, but with the extra power required to climb the mountain each leg, we were burning fuel faster than anticipated, but we kept the timer going for the fuel and monitored. After the 2-hour timer stopped, according to the gauges, the inboards were about half full. We flew a couple more lines after that which were approximately 10 minutes each. We noticed that our fuel was looking lower than planned on the left at about ¼ tank and was indicating just under half on the right so we decided to turn back early. We headed back to Madera and switched to the outboard tanks to drain them first and set a timer for 5 minutes at a time and planned for 10 more minutes as the gauges were less than a quarter full. We had about 5 minutes before the engine started cutting out. We quickly switched back to the inboard tanks and planned to land in Lemoore. Lemoore was the closest airport and we thought it would be best to land there. There was still fuel indicating on the gauges, again, just under a quarter on the left and now about a halfway between a quarter and a half, but we could not determine exactly how much fuel we had based on this. We requested to land at Lemoore Naval base for runway 14. The tower asked again about our request. We requested again to land and then said we were fuel critical. As we were in communication with the tower and waiting for clearance, our engines started sputtering. The tower shortly after asked if it was an emergency, and at that time we responded yes. Harneet was making the radio calls. There were two 14 runways. We started to make our way to the runway on the left as we had lots of altitude and were able to make a stable approach on either runway. As soon as we made a slight turn toward the runway on our left, the tower advised us that the left runway was closed. We still had enough space and height so we lined up for a stable approach on runway 14 on our right. Landing gear was down and before landing checks were completed. As we got lower and closer to the runway, we saw people and objects on the runway. We asked for clarification from the tower that we saw people on the runway. We were then advised to land on the other runway because that one was closed. At this point, we just had to turn and aim for the other runway last minute, but we were too low to make that sharp of a turn. In the end we landed on the grass and the aircraft rolled into the security fence destroying the aircraft and the fence in the process.

RECOMMENDATION (How could this accident/incident have been prevented?)

Operator/Owner Safety Recommendation

I was still in training and needed proper training on the survey flight planning. If the aircraft cannot do a 5 hour survey flight based on the cruise performance in the POH, then this would have been part of the training. I followed procedures as best as I could with my knowledge of the aircraft but not with survey ops. The person training me had time on type but was never PIC on survey so I did not have assistance with flight planning for survey. I filed the company OFP for 5 hours and was not advised at any time this was not possible. I did not know that gauges were not reading properly as they seemed to be balanced and reading accurately at throughout the first part of the flight. I am not sure how we ran out of fuel so quickly when we followed procedures and leaned the mixtures as recommended, unless we had a fuel leak somewhere as the flight was cut short and were only in the air for about 4.5 hours total.

ATC. A recording needs to be retrieved from the tower at Lemoore. Despite the above, we were on a high altitude, stable approach, would have made a safe landing on either runway. We were trying to land on 14L and started making our way over there when we were advised left was closed. We still had enough height to fly to 14R for a safe and stable approach. The tower would have seen us move to 14R and nothing was said. It was only when we were low and close to the runway when I saw people on it. Once we asked about it, tower advised that it was closed. This is what caused the accident.

Looking at the Notam for Lemoore after the fact, it shows that in fact, BOTH runways were closed. I did not review the Notam for this airport beforehand as I was not intending to land there. Given that this was an emergency and we declared it was an emergency, ATC should have cleared us for the correct runway.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on separate sheet)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

ADDITIONAL INFORMATION (Please type or print in ink)

Use this space if additional space is needed for any answers.

Harneet advised me he filled out a similar form for you but as a passenger. Perhaps this was an error because Harneet is a crew member. We have a company special ops document declaring we are a two crew operation and he is a crew member that also logs hours on flights with this company.

I HEREBY CERTIFY THAT THE ABOVE INFORMATION IS COMPLETE AND ACCURATE TO THE BEST OF MY KNOWLEDGE
