Description of Damage to Aircraft and Other Property *(Use additional sheet if necessary)*

Left wing tip within 18 inches of end scratched and bent up.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and and location, services obtained, and intended destination. Provide as much detail as possible.

Took off from JAC in good weather at about 1 pm for some sightseeing over Yellowstone. Landed in West Yellowstone (WYS) about an hour later. Borrowed the Courtesy car and had lunch and and took in the Grizzly Bear Center. Then returned to the airport, fueled up departed without incident. We flew around the Grand Canyon of the Yellowstone and returned to Jackson.

Upon getting within range and after receiving the ATIS info, I called into the tower. I reported my right midfield downwind and was cleared to land on Runway 01. Just before touchdown, a left quartering crosswind gusted, blowing my aircraft toward the center median as it picked-up my left wing. I corrected using ailerons to get back to the center line, but the left wingtip scraped the runway surface and somewhat righted me. However, not having a good feeling about my position on the right side of the runway, I initiated a go-around and called the tower to inform them of same.

Even after the go-around, I managed this time to keep the plane centered and land without further incident. Only after parking did I realize that the left wingtip was damaged and bent.

RECOMMENDATION (How could this accident/incident have been prevented?)
