Description of Damage to Aircraft and Other Property (Use additional sheet if necessary)

- Both main rotor blades were heavily damaged.
- The nose of the helicopter was heavily damaged and crushed inward towards the aft end of the helicopter.
- The tail boom separated from the main body of the helicopter.
- The tail rotor became separated from the tail gearbox and found approximately 100 feet away from the impact site.
- The landing skids are deformed to where they touch the belly of the helicopter.
- The left spray boom is broken off and separated from the helicopter.

The above information is based on photographs taken at the scene of the accident.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On 30 August 2024 at approximately 0640 (PDT) the pilot, Frank Michaud, piloting Helicopter N710WD, occupying the right seat, lifted off from Richvale airport to provide a customer with ariel application services. He had an uneventful flight in route to an orchard located at the corner of River Road and Laux Road. The pilot's intent was to land at the LZ where we had ground support personnel in position to take on a load of chemicals needed to service our customer and then begin the ariel application process.

The Landing Zone (LZ) description:

The landing zone consists of a cleared-out area inside the orchard with a service/entry road connecting to Luax Road. The terrain in the landing area is flat with the perimeter consisting of orchard trees approximately twenty feet in height. The specific location of the landing area is: N39° 14' 52.35" W121° 59' 27.09"

The full details of what occurred during the accident are still coming forward and a full narrative of history of the flight can not be supplied at this time.

Addendum: while in the touch down phase, pilot chose to relocate closer to the loading Equipment. As this was attempted Rotor wash induced turbulence and the helicopter encountered collective bounce. Because of landing surface uncertainty and proximity to person and equipment. Pilot chose to fly aircraft away. In doing so, the controllability of the helicopter was lost, and the helicopter struck the ground. End
