- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Substantial damage to aircraft. Aircraft ended up under a tree.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On September 26th I checked out Cessna 172, tail number N54829, from glass cockpit aviation. The intended route of flight was to head north from KBOI, circumvent KMYL continue to KGIC and then continue northeast to S92. The intended goal at Sierra 92 was for my passenger and I to scout out the back country and investigate future flight instruction that would be required for me to land in this type of environment. The intended route to return would be to refuel in KGIC and return to KBOI reversing the same route. Preflight was conducted as well as a run up and no insufficiencies were noted. The day was nearly windless, smooth air, sunny day with no clouds in the sky. When nearing S92, I flew over the ridge-line approximating runway 05 wanting to get a visual of the runway. Due to my starting altitude on descent, I was unable to achieve this objective. I did note that there was another aircraft landed at the airport. Upon circling back to begin the return to KGIC, I made a crucial error to get a visual of the runway on a low pass along runway 23. I had previously failed to set a minimum altitude that would guarantee no obstacles would prevent a safe flight home. I allowed the aircraft to get too low where I was unable to achieve enough lift to exit the Canyon. When it became apparent that it would not clear the ridgeline, a last minute attempt to make a turn back into the valley was attempted despite knowing the trees were at the level of flight path. I was flying the aircraft to its slowest speed before stall, this is when the aircraft hit trees and went down into the forest. I did lose consciousness going down into the crash. Upon regaining consciousness I noted the ELT was activated. My passenger had only minor cuts and bruises. I had several cuts and a broken collarbone. Fuel was leaking out of the tanks. We were very blessed that another pilot was in this Backcountry. My passenger and I were able to hike a few miles to the landing strip where the other pilot Larry was able to call for life flight.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

I should have received more flight training in the back country. I should have spoken with more pilots about the back country before attempting this flight. I should have had a minimum altitude that would have allowed passage out of the canyon. With my limited experience as a pilot, I should have not entered the canyon at all.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
