Email Report:

The Vehicle Recorder Division received a JPI EDM-830, S/N: 37428 (JPI_front.jpg, JPI_back.jpg). The device had sustained impact damage and data were recovered using surrogate laboratory parts. The final session was recorded on March 18, 2024, approximately 8 months prior to the accident event.

Subsequently, the internal non-volatile memory chip was removed, read out, and converted to engineering units using laboratory tools. The contents of the chip were evaluated and no additional data were yielded beyond March 18, 2024 . Therefore, no accident-related data were recovered.
