Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Extensive damage to right wing. Left wing fuel tank pierced. Landing gear destroyed. Propeller destroyed. Unknown damage to fuselage. Possible damage to firewall. Other possible unknown damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 12:00 PST, KPSP Tower vectored me to the North to follow I-5 as there was a Boeing 737 commercial aircraft on approach to runway 31L. ATC cleared me to land 31R on a 45 degree angle direct to the numbers and cautioned me for wake turbulence. The Boeing 737 landed a few seconds before I made a turn to line up with the runway. As I turned to line up with the runway, I encountered wake turbulence from the landing aircraft on runway 31L. The wake turbulence pushed my left wing up, and even with full aileron deflection to the left, I was unable to level the aircraft. Within seconds my right wing contacted the ground and the aircraft slid to the right and hit the ground upright and skidded off the runway.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

If ATC had not vectored me, I would have landed before the commercial aircraft. If ATC had vectored me further, the wake turbulence would have dissipated. If I had not accepted the landing and gone around the wake turbulence would have dissipated.
