- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

The end of the wing of N126GX was sliced off by the prop of N516ER. N516ER's prop struck N126GX's wing.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The departure location was KPRC, or Prescott Regional Airport. I obtained fuel services from Cutter Aviation. I departed Cutter Aviation at approximately 3:00 PM MST to head to KGEU, or Glendale Municipal Airport.

I taxied to the run-up area for runway 03R at KPRC. Four aircraft were in the run-up area, so I waited for a space to open up. After the far aircraft completed their run-up and left, I increased throttle to taxi forward and take their place. When I increased throttle, the engine revolutions reached as high as 3,000 RPM without the aircraft moving forward. I checked the parking break and made sure it was released. It took approximately 3,300 RPM for the aircraft to move forward. Due to the high RPMs required to start taxiing, I periodically checked the engine instruments to ensure that excessive throttle was not being used and the engine was functioning appropriately. When I approached the spot I intended to take in the run-up area, I misjudged the distance to N516ER and taxied the end of the left wing into the prop of N516ER. N516ER's prop subsequently struck N126GX's left wing, ripping off a section of N126GX's wing.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
