Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At approximately 1130 hours, I was conducting flight training at Los Alamitos Army Airfield with Instructor Pilot Matthew Sikorski. We were conducting general flight training as well as in-flight emergencies. At approximately 1210, we were practicing hydraulic failure emergency procedures. After identifying the proper emergency and completing the proper procedure, we continued inbound to land at 4 R. Utilizing the length of the runway, I planned to touch down without hydraulics at the departure end of runway 4 R.

Once over the departure end of runway 4 R, I touched skids down on the concrete and attempted to come to a complete stop. The aircraft began to slow down however, was drifting left towards the taxiway. IP Sikorski stated that he was taking the controls as I verbally acknowledged and released controls.

Once off the controls IP Sikorski repositioned the aircraft to remain on the proper runway. Simultaneously, I felt the aircraft become airborne as IP Sikorski maintained control of the aircraft without hydraulics. While 3-5 feet off the ground, without hydraulics, the aircraft began to yaw to the left as we continued approximately 2 spins to the left. IP Sikorski, without hydraulics was able to touch skids down however, the aircraft rolled to its right side. The aircraft came to rest just north of the departure end of runway 4 R on the concrete.

IP Sikorski and I were able to exit the aircraft without assistance and received minor injuries.
