

NATIONAL TRANSPORTATION SAFETY BOARD • PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT Use this form (Form 6120.1) to report civil and public aircraft accidents and incidents

BASIC INFORMATION
Accident/Incident Location

 Nearest City/Place: Reedley Municipal Airport State: CA

 ZIP: 93654 Country: US

 Latitude: 36.67100 Longitude: -119.45103

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

 Date: 12/12/2024 Local Time: 13:15
mm/dd/yyyy HH:MM

 Time Zone: PST

 Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

 Registration Number: N939RC

 Manufacturer: Zoll Jihavan Airplanes, s.r.o.

 Model: JA-600

 Serial Number: 6 343 385C

 Year of Manufacture: 2023

 Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Original Design ☐ Kit/Plans

 Make: Skyleader
☐ IFR-Equipped and Certified
☐ Commercial Space Flight
☐ Unmanned Aircraft

 Maximum Gross Weight: 1320 lbs.

 Weight at Time of Accident/Incident: 1067 lbs.

 Number of Seats: 2 Flight Crew Seats: 0

 Cabin Crew Seats: 2 Passenger Seats: 0

 Number of Engines: 1

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

The front end of the empennage has a larger dent/hole. The propeller blades were broken off. The front landing wheel is detached from the empennage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Me and my instructor met that morning a little before 11:30. We both talked about today's Flight, Did the TOLD cards went over endorsements, and made sure we had enough fuel in the plane.

We went out and did a preflight, going through the entire checklist, and prepared to take off of runway 16. Our flights were good—minor instruction, as well as three touch-and-goes. We landed, and he left the plane for me to solo and let my Aunt into the airport. I waited to start up the plane until he was back. I went through my checklists and headed to RWY 16, departing at 12:57 PST.

1st pattern was ok, had to touch and go because I didn't like my landing, as something felt off when I was on the ground with the landing. But during the pattern it was good. 2nd pattern was my first full-stop landing. Everything was good on the Flight, the landing was good, and the Comms were good. 3rd pattern everything was good leading up. On final, I had to reduce my power to reach my desired Point, but my airspeed was around 60-63 knots. I came in too close to the runway then did my round-out and flare. Once my front wheel touched the ground, I felt I had lost control of the aircraft. I felt the that the front tire wasn't responding correctly and was also making a loud thumping noise from my position in the plane as it started to skid left and right. I tried to regain control of the plane, I bumped the power slightly and immediately brought it back as I was going to retract my flaps. But it veered left and hit the sign. From that point, the aircraft was down, and the only injuries I had were small scuffs and bruising to my shin. I made sure that the engine and electrical systems were shut off. My instructor helped me get outside of the plane. We came back to the instruction zone for me to write my statement.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Keeping a level head and focusing on the moment. Making sure to keep my actions smooth. Be more aware of if there are any mechanical issues with the plane or caution if any errors are present.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
