☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Extensive damage to left wing spare, nose gear, and left main landing gear. Prop damage and engine damage is unknown at this time.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

As requested here are my written statement to the best of my recollection the timeline of events that took place prior to the mishap of N171M. As per my original written statement. We departed KLGB on a VFR flight to KHND. The Route of flight was KLGB, Paradise VOR, HEC VOR then direct at 15500ft. We were on Flight following from Long Beach. 8 Miles out contacted KHND Tower with ATIS information N. We were cleared to land Runway 34L. I was using the Garmin NXI flight director and activated the visual approach for the runway providing glide slope. I executed a stabilized full flap landing with 100Kts on short final and 90 KTs over the numbers. On the flare the airplane floated a bit. As I held off the landing a very noticeable crosswind and windshear as wind gust caused the airplane to windmilled 10 degrees to the right. Corrected with rudder inputs however the left main touched down and swung the airplane to the left and caught the side of the apron and veered hard to the left. Full braking ensued until impacting a ditch that separated the runway from the taxiway at a 45 degree angle and came to rest. Emergency egress after power shutdown. The passenger named Brandon open the door and we all egressed safely. ETL was transmitted and I spoke to the AirForce base representative and said we were safe and then deactivated.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
