Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Fuselage damage front wind screens broken doors broken Main Rotor blades destroyed

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Danny and I had just finished doing 3 or 4 patterns and pick ups and set downs. Danny flew the helicopter the entire flight. He set down 60 or so feet from his hangar at HOB on the east ramp. We (He) shut the helicopter down. We exited the helicopter and went into his hangar where I wrote the ~~go~~ required solo endorsements. About 20-40 minutes passed Danny then proceeded back to the helicopter did a walk around of the aircraft. He entered the Right front seat. Fastened his seat belt. I watched him grab the checklist and heard him do the flight control check. It was probably 5-10 minutes till he fired the helicopter. I heard the helicopter go to 100% RPM and him roll off to hear the ^{low RPM} horn.

I was 40-60' away at the back tailgate of my vehicle watching this. I watched him look forward clear left and right

I watched Danny Raise the collective when the left skid came off the ground first. I watched him almost in a panicked state Rip the collective up which the he went airborne and spun to the right watched what looked like him try to save it with cyclic input wobble right then left when the Retreating blade struck the ground push the over onto its left side. where the helicopter came to a complete stop.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

aborting pick ups "lowering collective rapidly when uncomfortable in a Pick up"

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
