☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Main rotor and tail rotor impacted asphalt. Tail boom seperated, and fuselage seperated from skids.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I arrived at shared hanger to find hagar door open and other tenant's car parked under the hangar door. I erformed my preflight, cleaned windows, etc and pulled aircraft onto the taxi way with dolly hooked to an ATV. I called for fuel from the FBO on the phone. I asked the other tenant if I could move the car and shut the hangar door. I was told not to worry about it. I asked "are you sure?" She reiterated it was ok. I walked to the aircraft and determined that I had enough room to move off the dolly and land to take fuel from the fuel truck when it arrived. I did a normal run up and began to lift off the dolly. As I climbed in a hover to an altitude to clear the ATV, my main rotor struck the open hangar door and the helicopter immediatly yawed right and decended. My immediate thought was that I had snagged the skid on the dolly somehow. The aircraft came to rest on its left side. The engine was still running so I shut it down, shut off all fuel and exited the aircraft through the broken left windscreen.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

I have taken off and landed to this exact spot dozens of times without incident. My standard routine is always to shut the hangar door prior to takeoff. Several things would have prevented the incident. One, do what I always do and shut the door. Two, pull forward with the dolly and avoid the door all together. Most importantly, a more thourough walk around would have highlighted how close I was to the door and one of the previously stated solutions would have happened.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
