Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Tail boom/fuselage broke behind the wings, wings stress, splitting the leading edges of one wing

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On a glider cross country trip, crossed Okanogan Valley starting at 12.8K, hoping to make Ferry County airport in Republic, but promising clouds didn't provide anticipated lift, finally needed to find a place to land. I saw a nice road without power lines and landed into the wind, but a wingtip caught some gravel in a soft shoulder and I ground looped. The fuselage broke behind the wings.
No injuries to me.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Better situational awareness, less focus on completing the mission, turn back earlier despite promising lift ahead, and radio reports of the same...it may not be there when you arrive.
Landing on a road...choose the most straight section to lessen need for rudder control, stay on the main gear as long as possible, avoid dropping a wing onto the shoulder.
