NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Landing on Runway 31 at KCPU, June 20, 2025 11:50 am Local Time. AWOS reporting 6 knots at 320 degrees. On final approach I experienced a sinker followed by a riser which lifted me approximately 50 feet. This is not an unusual approach to runway 31 at KCPU. Landed on the main gear and everything felt normal as I allowed the energy to dissipate and eased the tail wheel to the runway. Within a few seconds of the tail wheel being down I was hit by a strong gust of wind (dust devil) which turned the plane 90 degrees to the left. The terrain drops off at a sharp angle approximately 50' from the edge of the runway. Within approximately 50 feet past the drop in terrain the main gear collapsed and the airplane came to a complete stop.
