☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Right wing tip must have hit the ground because it was scraped and dented. Left wing tip also hit something as both ailerons were pushed towards the flaps.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

After pre flight departed Parma airport about 18:00 with 9 month old puppy. Purpose of flight was to continue getting her used to flying. She does very well, staying still and becoming more relaxed with flying. We made it to 4500' and headed toward 28U. Wasn't planning to land but when almost there I noticed the oil temp was 25 deg higher than normal. Decided to land & let the evening cool off a little as well as check the oil level before returning to Parma. Having landed there before I was comfortable doing so and everything went well on approach and touchdown. As I was slowing to a stop, the plane verred hard to the left and the left wheel hit a bush off the edge of the runway apparently causing the right wing tip to strike the ground. It happened so quick I'm not sure exactly what happened. My best guess is either a rut in the runway or a gust of wind caused me to turn to the left. After hitting the bush the plane came to a stop. I shut the engine off and exited to assess what happend. I decided with my limited experience as a pilot the best coarse of accion would be to get another opinon on how to proceed. After securing the plane in place with tie downs some fishermen gave me a ride back to the hanger. After reading the accident reporting requirements it didn't appear to me that I had an accident. I consulted one of my flight instructors and he assured me that I didn't need to report anything as it was in incident and not an accident.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

The mistake I certainly made was being over confident in my abilities. I had debated either working on landings that evening or going to see if the Owyhee lake was full. I had been doing landings pretty consistantly and decided to take a break. One of my instructors had told me 100 hours is the dangerous time period. She said pilots start to get comfortable flying and over confident. I remembered that warning on the boat ride home with the fishermen. Sure wish I had continued my landing practice in the patern.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
