

NATIONAL TRANSPORTATION SAFETY BOARD • PILOT/OPERATOR AIRCRAFT ACCIDENT/INCIDENT REPORT Use this form (Form 6120.1) to report civil and public aircraft accidents and incidents

BASIC INFORMATION
Accident/Incident Location

 Nearest City/Place: Helena State: MT

 ZIP: 59602 Country: USA

 Latitude: 46.607568 Longitude: -111.980234

(Enter in decimal degrees or degrees:minutes:seconds)

Accident/Incident Date/Time

 Date: 07/23/2025 Local Time: 21:45
mm/dd/yyyy HH:MM

 Time Zone: MT

 Collision with Other Aircraft: ☐ Midair ☐ On-ground ☒ None

AIRCRAFT INFORMATION

 Registration Number: N5204C

 Manufacturer: Beechcraft

 Model: Bonanza

 Serial Number: D-2549

 Year of Manufacture: 1,950

 Amateur-Built: ☐ Yes ☒ No If Yes: ☐ Original Design ☐ Kit/Plans

Make: _____

- ☒
- IFR-Equipped and Certified
-
- ☐
- Commercial Space Flight
-
- ☐
- Unmanned Aircraft

 Maximum Gross Weight: 2,850 lbs.

 Weight at Time of Accident/Incident: 2,560 lbs.

 Number of Seats: 4 Flight Crew Seats: 1

 Cabin Crew Seats: _____ Passenger Seats: 3

 Number of Engines: 1
Category of Aircraft

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Wings destroyed. Significant damage to fuselage. Propeller destroyed. Relatively minor damage to the building that was struck.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was flying back from Great Falls, Montana. Shortly after 9:30 PM, I approached the airport from the north, coming over the last ridge of mountains at 6,500 feet MSL. I began my decent, listened to the ATIS, and about 10 miles out, I contacted the Helena tower. The tower advised me contact them when I was turning a right downwind for Runway 27. At that point, I noticed I was straight north of Runway 17. I double checked the length of the runway, which was approximately 3,000 feet. I then contacted the tower and requested to land on Runway 17, primarily because I had never landed on that runway before.

About five miles out I slowed down to 120 MPH, lowered the landing gear, pulled the throttle all the way back, and lined up with the lighted runway. The American Bonanza Society does not recommend landing with flaps, and normally, I don't land with the flaps extended. However, in this case I noticed I was a little high, and I thought I fully extended the flaps. I say thought, because in looking at the wreckage and controls afterward, it appears clear to me that the flaps were not extended at the time of the accident. However, my recollection was that I had extended the flaps.

I then approached the runway, rounded out, began the flair, and waited for the landing gear to settle on the runway. I then noticed I was more that half-way down the runway, and had not yet felt the aircraft touch down. So, I decided to do a go around. I shoved (what I thought was) the throttle in, and nothing happened. I then looked down to see I had shoved the fuel mixture in (which is right next to the throttle). I then shoved the throttle in, and felt the aircraft pick up speed.

I pulled back on the yoke to clear the fence at the end of the runway. I felt the aircraft climb. I had a positive rate of climb, and thought I was high enough to begin a turn to the left. I also thought I should retract the flaps. However, I don't believe I had actually gotten to that point yet. Once these more urgent issues were taken care of, I planned to contact the tower to let them know I was doing a go around. However, I had not yet contacted the tower as flying the aircraft was taking my full attention. At this point, I felt I had successfully begun the go around.

What happened next, can only be described as being like watching a movie, where it cuts from one scene to another, and it takes you a few seconds to realized what has happened. The next thing I knew, the aircraft was skimming across either on or near the ground, as I watched a red building approaching, which the left wing ultimately hit.

After the airplane came to a stop, I tried to contact the tower on the radio, but was unsuccessful. At least, I could not hear them. I opened the door to the airplane, and shut off the master switch. As I exited the aircraft I found my phone, and called 911, to report the accident. First responders then showed up, and took me to the hospital.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Initiated go-around sooner, therefore using a lower angle of attack. Opting to land on the primary Runway 27.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
