Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Wings damaged at time of incident but also on plane removal from site under fabric, prop strike tail damage, gear damage, Cockpit glass damaged tail damage, horizontal stabilizer damage fabric only

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I had slightly elevated EGT on flight felt precautionary landing was appropriate to evaluate. Chose a spot to land grass obscured boulder, upon roll out after uneventful touch down boulder hit left main causing Cabane V to break and left wing to hit land with no rudder authority or breaking could not steer plane and it slowly moved toward small creek that was in a 4-5 foot depression. The nose fell into cavity and slowly flipped plane upside down at approximately 15 miles per hour.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Key lesson on this accident/incident was choosing a landing site that can be more readily inspected. As grass gets longer in the summer it can obscure obstacles on the ground. I should have safely chosen a more barren landing site free from obstacles that could be verified prior to landing.
