Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Prop damaged / strike. Cowl bent, right gear leg sheared, left gear axle broken, both floor boards damaged at gear boxes, fuselage bent at tail section to the right, right wing has substantial damage from strut out board and right aileron is torn off, horizontal stabilizer and elevator damaged, tailspring and tailwheel torn out of fuselage. No other property damage or injuries.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Takeoff from Flying Elk on 17 was proceeding as normal with a wind of approximately 5-10 mph from 140-150 degrees when very strong cross wind / microburst from approximately 090 @ 40-45 mph (described by witness) picked up the left wing, causing the right wing tip to drag on the runway at rotation. The aircraft skewed to the right and left the runway towards the adjacent lower terrain, before the gust (now a direct tailwind) caused the aircraft to sink into the brush where it clipped a ditch and sheared the right gear leg causing the aircraft to contact the ground in a right wing low, nose down attitude, resulting in the damage described above. There were no injuries or property damage. There was a cell / thunderstorm about 20 miles to the east, moving in a westerly direction that would likely have been the source of the wind shear / microburst experienced at this plateau / ridge runway.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
