 Wrinkled wing skin on right side - replace

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I entered a right down wind as authorized by tower for runway 2. I completed down wind, right base and turned final. I crossed the numbers at 90 knots. I started a wheel landing, but failed to add a little throttle to hold nose level. I decided to change to a three point landing. As the nose came up, I lost sight of the runway. There was a slight bounce, sticking the second time. I thought all was good. However, I had landed with nose pointing left. Application of right rudder did not correct the problem. I departed the runway, causing damage to airplane. No injuries.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

Added a little power and continued with wheel landing.
