Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Substantial damage to landing gear, gear doors, minor damage to the left wing, and propeller.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On Sunday October 12 2025 at approximately 1400, myself and [REDACTED] pre-flighted the aircraft with the intention of doing pattern work after recently completed annual inspection. Obtained weather from OLM ATIS and taxied to run up area where I completed the run up checklist. I taxied to RWY 17 via taxiway B and obtained clearance from OLM TWR for VFR departure. Departed normally and entered left traffic at 1300 MSL, at midfield downwind I received touch and go clearance from OLM and I extended the gear and confirmed extension with indicator lights and mirrors. Made normal left traffic pattern to RWY 17 with touchdown speed of 65 mph.

I then proceeded to reconfigure the aircraft for takeoff. When attempting to raise the flaps, I mistakenly grabbed the gear lever and raised it. I was unable to replace it to the down position before the gear began to retract. The aircraft contacted the runway surface at approximately 55 mph and slid for about 100 yds stopping at the 1000 ft markers. [REDACTED] made a mayday call to OLM and we exited the aircraft.

The only debris were small pieces of the gear doors, anti-collision light and an antenna.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

This could have been prevented by establishing positive identification of the control lever being operated.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No
