☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Left Wing Tip damaged, Landing gear bent, 2 of 3 blade prop broke. Engine was stopped and recieved no damage.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On a clear calm Saturday morning I decided to go on a local ride in my Kitfox airplane. At approximately 11:45 am I warmed up my plane and took off from the airport in St. Anthony Idaho and flew north over Ashton and then east to the Mesa Falls area then back to the west where I hooked up with a friend in his Kitfox. We then flew north to Kilgore Idaho where we landed on a dirt road. It was a narrow dirt road that had quite a bit of crown in it but didn't give us any problems and we both made good landings with our tail dragger Kitfoxes. We pulled off the road and got out of our planes and talked and commented on what a beautiful fall day it was and talked for a short time. We decided to get back in our planes and take off. I got back onto the road to take off and started down the road as I was trying to get my tail off the ground I realized that I had not set my trim for take off. I always make it a habit to set it when I'm taxiing after landing but realized in all of the excitement that I hadn't. This just makes more pressure on the stick and I should have been able to get off the ground and then adjust it for flight and take the pressure off the stick. As I pulled back on the stick to get off the ground, the grip on my stick came off and I lost control of the plane. I quickly pulled the throttle and killed the engine but couldn't regain control of the plane. I had not left the ground and the plane left the road to the right and went through the barrow pit of the road and hit the wing tip and sent me out in the sagebrush and the plane came to a stop as it tipped on to the nose and broke the prop. As I undone my seat belt, I realized I still had the grip in my hand. I climbed out and assessed the damage with a lot of frustration and realized what I had happened. Not a good day!

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

This accident could have been prevent had I checked my trim before taking off. I was out of my usual routine and landed at a new place for me. I recommend that handle grips be checked and I will glue mine on so that doesn't happen again.
