Plan was to take a local flight, do some pattern work and practice. Upon traveling to airport I called into the local AWOS on my cell phone to get weather, mainly for winds. Initial AWOS said winds were out of 310 at 5 knots.

Preflight went well and was successfully completed. No hazards or concerns noted.

Upon listening to AWOS through the radio, it now said winds were calm. It was evident by looking at wind sock and local flags around the airport, that the wind wasn't calm, and looked fairly variable in direction and intensity. It appeared to favor a take off to the north off of runway 1. Winds did not appear to be overly gusty but again there was some variability. I again listened to AWOS which again said winds were calm.

I taxied to first hold short line. Made my call. Crossed runway 19 B1 to A1 and taxied down to the south run up area for Runway 1.

Upon arriving at run up area, the wind sock there now showed what appeared to be a cross wind out of approximately 270 but again was somewhat variable and possibly could have favored a takeoff off of runway 19. I debated about taxing back to use runway 19 but didn't feel the wind at that moment would impact me too much. If anything I may would have a slightly longer takeoff roll.

Run up went well. No concerns or abnormalities were noted. I again listened to AWOS. Winds were still listed as calm with some sky conditions now missing. Density altitude was 6,300.

I taxied over to the hold short line. Made my call. Another aircraft radioed they were inbound on the RNAV for 19. I radioed back to them to confirm their location. They said I had plenty of room to go ahead and go. I made my call and entered runway 1.

Upon acceleration, everything looked good. Oil pressure, ammeter. Air speed was coming alive. I had to put in a little right rudder. I felt there was a little wind coming from the west and given what the air sock showed I was anticipating that. I turned my yoke to the left. I was nearing rotate speed and tried to pull back slightly. At that time plane veered off to the left and into the gravel. Everything happened so fast. I slid into a berm of dirt frontwards and it caused the plane to nose into the ground and flip over on its top. I was able to crawl out passenger door. After a quick evaluation of myself, I check the plane. There was no fire. I was uninjured except for a scratch on my left elbow.

I could not find my phone so I started walking to the FBO. The airport manager showed up and picked me up. As we went back to the plane, we talked about how winds were indeed shifting and strengthening. I feel like a gust got under me from the east and pushed me off to the west.
