Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)					
Total Loss of Airplane					
NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)					
Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.					
Summary of Event: I was just going to site see around the area from KCPU on 11/3/25 at 12:52 pm. However, during the takeoff at approximately 30 knots, I recognized that my seat was positioned one notch farther back than I was accustomed to for proper rudder control. I attempted to adjust the seat forward while continuing the takeoff roll. Due to the thrust and acceleration, the seat moved fully rearward instead of one notch forward. This resulted in my inability to maintain the necessary rudder control. The aircraft subsequently veered off the runway.					
The conditions were clear, and I utilized runway 31. My aircraft went over the embankment and travelled approximately 1/2 mile down the embankment through fields and hit various lava rocks. The last rock hit flipped the plane upside down and broke the plane apart. There were no other passengers and there is no damage to anything other than myself and the airplane. I was transported via ambulance to a trauma location in South Sacramento					
OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)					
Corrective Actions Taken:					
I will incorporate a full and deliberate seat-position verification into my before-takeoff checklist, including confirming positive engagement of the seat locking mechanism.					
I have reviewed and reinforced the importance of aborting takeoff if any control anomaly or cockpit adjustment need is recognized prior to liftoff.					
I will be completing before my next flight a self-review of takeoff procedures and aircraft control priorities under supervision from my instructor.					
Reflection:					
I take full responsibility for this event. I recognize that adjusting the seat while the aircraft was accelerating was not appropriate. I am committed to improved discipline in checklist adherence and cockpit readiness before power application. I am confident in my abilities as a pilot and remain dedicated to continuous safe operation and good judgment moving forward.
