☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

At around 11:00 AM I took off from 18 remaining in the pattern. This was a test flight so I was checking oil pressure, temperature and flight controls. I remained in the pattern about 30 minutes. I flew west ascending to 4500 ft. and was doing stalls and assessing the glide ratio. The plane was operating normally. I turned to the east and flew about 20 miles before returning to the airport to land. It took me 5 go arounds before I made a successful approach. The plane does not have a good glide ratio so I was figuring out the proper RPM for the approach. As I rounded out I mistakingly cut the power causing significant loss of energy. I tried to put power back in but it was not enough to arrest the drop onto the strip. The plane ran off the strip into the field surrounding the strip. I was on final for 36 and the plane departed the strip to the left. Once in the field the plane flipped forward onto its back. I may have come down on the nose wheels, there is damage to the nose wheel.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

This accident could have been avoided by maintaining power till I touched down.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
