- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Right wing damage from tree strike, right fuselage wrinkled, two propeller blades damaged, bottom of cowlings crushed and engine exhaust bent, top window cracked in multiple locations. No other damage noted however aircraft is located in a large blackberry bush which limits further inspection. No damage to property.

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I took off from WA87 at approximately 15:17 for another phase one test flight. The aircraft had been refueled two days prior and all tanks were full. The fuel selector valve was in the Both position. I climbed to approximately 2000 MSL and flew East, then turned Northeast for approximately 15 minutes and then turned back toward my home airport (WA87.) I was cruising at about 2100 feet MSL when I smelled something was hot. I scanned my engine instrumentation and noted everything was indicating within normal parameters. Specifically engine oil pressure, oil temperature and engine coolant were in the green range. The alternator was producing power and there was fuel pressure.. I set a direct to waypoint to have a direct path to my home airport which was approximately 4 miles away. Shortly afterward the engine suffered a complete failure.

After the failure I scanned for an acceptable landing location, identified a location to my right and turned toward it. During my descent I made a Mayday call several times on 122.9. I did not get any response. I attempted to switch to another radio and set the transponder to emergency. However I was wearing flight gloves which prevented me from changing radios and the touch screen did not recognize the touch of my glove. At that point due to altitude loss I abandoned any further communication attempt to focus my attention on the emergency landing. As I turned right onto a base leg I altered my course to avoid two houses. From my NE landing direction the landing area is sloped downward and also sloped from left to right. The field was occupied by a few cattle and had two large stumps.. I avoided the houses and attempted to slip down for the landing. Avoiding the cattle and the two large stumps I set down but was unable to stop. The aircraft hit a sharp rise and then slide downhill entering a large blackberry bush. When the aircraft hit the blackberry bush the right wing hit something, I assume it was a tree, and spun to the right.

After coming to a stop I turned off all electrical and contacted emergency services and exited the aircraft

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

At the time of writing this report I can not make any recommendations. Certainly the flight gloves prevented emergency communication. One issue with electronic touch screens. The cause of the engine failure is still unknown. Once that has been determined perhaps changes to installation, maintenance or manufacturing could be recommended

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)

I suspect there was a failure with the Engine Control Unit (ECU) causing the engine to stop running.

Total Time/ Cycles On Part

16.3 Hours

_____ Cycles

Time Since This Part Inspected/Overhauled

16.3 Hours**FUEL & SERVICES INFORMATION**

Fuel on Board at Last Takeoff

(Convert from pounds, as necessary)

51.0 Gallons

Fuel Type

☐ 100 Low Lead☒ Automotive☐ Jet A☐ Jet A-1☐ Unleaded AV☐ Other, specify _____

Other Services, if any, prior to departure:

EVACUATION OF AIRCRAFTWas an emergency evacuation of the aircraft performed? ☐ Yes ☒ No

Method of Exit – Describe how the occupants exited and how many occupants evacuated each location:

I opened the pilot's door and climbed out. I was the only occupant.

OTHER AIRCRAFT – COLLISION (If air or ground collision occurred, complete this section for *other* aircraft.)

Aircraft Registration Number

Manufacturer: _____

Damage to Other Aircraft:

☐ Destroyed☐ Minor☐ Substantial☐ None

Model: _____

Registered Owner of Other Aircraft

Pilot of Other Aircraft
