Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The following statement is based on interviews conducted with student pilot [REDACTED], CFI [REDACTED], and findings from the maintenance department.

On January 21, the student pilot [REDACTED] and CFI [REDACTED] were scheduled for a dual instructional flight from 8:00 AM to 11:00 AM. During dispatch, CFI [REDACTED] instructed the student pilot to proceed to the aircraft to begin the preflight inspection while he completed dispatch tasks, advising her that he would join her shortly.

While en route to the aircraft, CFI [REDACTED] was approached by maintenance personnel and advised that, following the flight, the aircraft would need to be returned to the hangar for routine inspections.

The student pilot completed the preflight inspection. Due to cold ambient temperatures, she elected to start the engine to keep the aircraft warm while awaiting her instructor. The student stated that she set the parking brake, followed the checklist, and initiated engine start.

Following engine start, the aircraft began to move. The student reported applying the brakes; however, the aircraft continued rolling and began to veer. She stated she was unable to determine why the parking brake was not holding. The aircraft subsequently struck a parked vehicle, first making contact with a window, then continuing into a second vehicle, at which point the aircraft came to a stop.

CFI [REDACTED] reported hearing the impact and immediately ran to the aircraft to assist the student pilot.

As part of the internal investigation, maintenance personnel determined that the parking brake was not in the fully engaged position.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

To prevent similar incidents, American Flyers will reinforce strict adherence to established company policies during dual instructional flights. These policies require instructors to directly supervise student pilots during preflight and engine start activities and prohibit individuals from entering or exiting the aircraft while the engine is running.

Additionally, emphasis will be placed on ensuring that instructors remain present with the student pilot until all preflight and engine start procedures are complete. These procedures will be re-emphasized through instructor briefings and standardization to ensure consistent application across all training operations.
