Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

The plane crashed into 2 parked cars

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

I was sent by my instructor [REDACTED] to preflight the aircraft and move on the POH checklist. He said I will be right behind you as I need to gather some paperwork. He nor any other instructor at this school ever told me to not start the aircraft without them not once. As I went through my checklist I had gone through it in detail and now it was time to continue into the cockpit. It was the first flight of the day so I was preparing for a cold start. So I had gone through the check list where it mentioned the BRAKE set which it was. My seat was not fully in place yet as that was on the next check list that followed, So I checked the mixture and prime the mixture, then proceeded to open Throttle 1/2 as it requested. I checked to my left and right and yelled clear prop! As I pressed the start button and engaged the mixture all the way the aircraft started. The nose of the aircraft dropped as it normally does but it bucked off and started going. My feet were further from the manual brakes so I could only lightly press on the brakes and rudder by that time the aircraft was in a more enclosed parking area. So it was like 3 minutes or less and I could not stop the aircraft so it hit 2 cars then it stopped. I was completely caught off guard when the aircraft jumped and bypassed the set brake. I was not expecting that and neither was I prepared for what had transpired after. I was glad nothing had happened to me or anyone else. As I was standing next to the aircraft after the accident. My instructor had then shown up, clearly close to 30 minutes after I was sent to the aircraft. I ran to him and said OMG the set brake did not work and the aircraft bypassed it, has this ever happened before? He then said yes the aircraft breaks can be faulty. I said FAULTY! How could this be and why was I not made aware of this so that I could take better precautions. He did not say anything at the time, mind you I had started the aircraft many times before and this had never happened except for this morning. I had then asked the mechanic who works on the aircraft how this could have happened. He said this was something that could happen where a set break could fail. He then explained to me that yes this could happen because if the aircraft is set overnight the hydraulics on the brake could expand and would need to be reset again by adding pressing the manual breaks to add pressure to set them. He said it's best practice to have your feet on the manual brakes to avoid this even if it does not state it in the pOH. I was just inexperienced and was following the checklist as it was stated. And breaks are not checked until you are taking you and the instructor.

This is my statement of what happened glad nobody was injured,

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

If I would of been made aware of a faulty break. That after an aircraft sitting overnight one should always reset parking break becuse the breaks could of expanded thus making the set break faulty. This inforation would of made me more precstution and I would of too extra steps to prevent this. If the instructor would said to not turn the aircraft on until he was in the plane. That would of also helped to preven this outcome.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)		
Was there Mechanical Malfunction/Failure? ☐ Yes ☐ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i> Set break was faulty	Total Time/ Cycles On Part _____ Hours _____ Cycles Time Since This Part Inspected/Overhauled _____ Hours
