NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

We took off from KENV at 18:00 local time and headed East. We flew over the Bonneville Salt Flats and descended in altitude to get a closer look of the sunset reflecting over the thin water layer on the flats. We turned to the North and I initiated a climbing turn to the left to flip around and head back to the southeast to depart the area. In the climbing chandelle maneuver I added full power, banked to the left, and initiated a climb. At some point during the maneuver power was accidentally reduced and I didnt notice. At the top of the climbing turn my passenger and I noticed the airspeed was really low. I lowered the nose to regain airspeed and assumed the power was fully in and that we would recover from the low airspeed without any issues. However, we very quickly were in a nose down diving position and because of our low altitude I had very little time to troubleshoot and recover and was only able to bring the nose up to ensure a flat landing on the flats.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

This incident could have been avoided had we given ourselves an appropriate altitude cushion. Though we were in class G airspace and the salt flats is a completely flat place devoid of any dangerous obstacles or hazards, when you fly low to the ground you have very little time to react and recover if something happens. This was an unfortunate pilot error and an important lesson was learned that it is much better to be safe than sorry.
