Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

There were no injuries and no damage to third-party property. The aircraft was destroyed. A post-impact fire occurred after ground impact.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

On March 2, 2026, N258MF experimental aircraft was engaged in a transition test flight at Castle Airport (KMER), Atwater, California. The flight took off under VFR flight rules in accordance with 14 CFR 91 at approximately 13:54 PST in light and variable wind conditions. After a nominal hover and entry into transition from vertical to forward flight, the aircraft experienced control and estimation issues during this complex and highly dynamic transition operating regime. During the ensuing upset sequence, motor pod 4 failed under extreme load, further limiting recovery capability. The aircraft departed controlled flight and impacted the terrain at Taxiway Alpha at Castle Airport. All debris was collected after coordination with the FAA and NTSB. The aircraft was destroyed. There were no injuries and no damage to third-party property.

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MightyFly has identified improvement areas relating to transition-control architecture, estimator robustness, simulation and modeling and structural and propulsion considerations during upset conditions, and is incorporating those findings into its ongoing engineering and flight-test program.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)		
Was there Mechanical Malfunction/Failure? ☒ Yes ☐ No <i>(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)</i>		Total Time/ Cycles On Part _____ Hours _____ Cycles
One MightyFly motor pod, containing two motors, failed under extreme load during the upset sequence. The event occurred in the context of transition-flight post control and estimation issues identified in the company's investigation to date.		Time Since This Part Inspected/Overhauled _____ Hours
