☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Aircraft Explosion

- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The pilot explained that he was on a personal flight with his father to gain flight time in their family-owned helicopter. The purpose of the flight was to practice off-airport landings.

After landing in an open meadow, which was approximately 200 yards in size, the pilot decided to take off using a "circling" maneuver. He described this maneuver as making a low-level orbit to gain effective translational lift (ETL).

The pilot reported that he executed a large left-hand orbit close to the ground to gain airspeed when the helicopter began to descend. During this maneuver, the left skid caught the dirt, causing the helicopter to roll over onto its side. It completed at least one full roll before coming to rest on its belly.

The aircraft sustained substantial damage, including the airframe, tail cone, empennage, tail rotor, main rotor blades, and the skids, which were torn off upon impact.

Departure time 2:00 P.M MST from MT48

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

Keep higher clearance above ground in circling maneuver. This way if you were to experience a sudden loss of altitude again you would have more clearance above the ground and time to try and make a safe recovery.

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
