- ☒ None ☐ Both Ground and In-Flight
☐ In-Flight ☐ Fire at Unknown Time
☐ On-Ground ☐ Unknown

Description of Damage to Aircraft and Other Property *(Use additional sheet, if necessary.)*

Propeller struck the wing and the ground destroying the wing and propeller. right rear tire was flat. main mast snapped off.

NARRATIVE HISTORY OF FLIGHT *(Please type or print in ink.)*

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

Upon landing, the trike oscillated back and forth until such time as it tipped over. At which time the propeller hit the wing, then hit the ground. The main mast where the wing was mounted then snapped. Trike slid about 20 feet on its side. I tried putting air in the flat right rear tire and it would not hold air. I assume the oscillation started due to that tire going low or flat during the flight. They are low pressure turf tires so the extra drag would have caused major drag on that side. No injuries other than my pride..

OPERATOR/OWNER SAFETY RECOMMENDATION *(How could this accident/incident have been prevented?)*

MECHANICAL MALFUNCTION/FAILURE (If more space is needed, continue on a separate sheet.)Was there Mechanical Malfunction/Failure? ☐ Yes ☒ No

(If yes, list the name of the part, manufacturer, part no., serial no., and describe the failure.)
