Description of Damage to Aircraft and Other Property (Use additional sheet, if necessary.)

Aircraft was substantially damaged

NARRATIVE HISTORY OF FLIGHT (Please type or print in ink.)

Describe what occurred in chronological order, including circumstances leading to and nature of accident/incident. Describe terrain and include wreckage distribution sketch if pertinent. Attach extra sheets if needed. State departure time and location, services obtained, and intended destination. Provide as much detail as possible.

The aircraft departed Auburn at 3:30pm local time and proceeded direct to Sonoma Valley Airport arriving at 4:15pm local time. The pilot performed a straight in approach to runway 25. During the approach the wind shifted from the Southwest to the northwest. Upon touchdown, with the uneven surface of the runway the aircraft bounced several times after which the pilot executed a go around. During the go-around the aircraft veered left and entered a departure stall and then impacted the ground. Terrain was not a factor, likely factors were strong, gusty winds and a wind shift during the approach, as well as a heavily loaded aircraft, although still loaded within limits and under max gross weight.

OPERATOR/OWNER SAFETY RECOMMENDATION (How could this accident/incident have been prevented?)

Selecting a more suitable runway into the wind and loading less fuel/weight in the aircraft
