June 11, 2026

Pilot and flight instructor were conducting a local commercial training flight 10-15NM south of the aircraft's home airport, Reid-Hillview Airport (RHV). Plane departed around 2:30PM PDT out of Reid-Hillview Airport and pilot & flight instructor practiced commercial maneuvers near Anderson Lake Reservoir and Coyote Lake Reservoir. At around 3:25PM, pilot & flight instructor were practicing eights-on-pylons in an area the flight school designated as a ground-reference maneuver practice area. Location is under the San Jose International Airport (SJC) Class C 3000/6000' shelf in Morgan Hill, CA approximately 15NM southeast of SJC. Once pylons were chosen, the pilot made a left turn to the southeast at 1200MSL to enter the maneuver in the downwind. At 3:30PM, both pilot & flight instructor saw a large black bird making a climbing left turn in close proximity of the aircraft. Pilot immediately reacted by diving the aircraft while in the left turn however the right wing impacted the large bird. As the pilot leveled the wings of the airplane, the flight instructor saw the substantial damage on the leading edge and took control of the aircraft. The airplane had a moderate tendency to yaw and roll to the right. The flight instructor began a climb to 2500MSL and declared an emergency to NorCal TRACON (120.1). The flight instructor went direct to San Martin Airport (E16) and executed an emergency landing on runway 14. At 3:37PM, the flight instructor landed safely, exited the runway, and parked the airplane. No injuries were sustained by the pilot or the flight instructor.
